CLEARING THE WAY TO THE 5TH DIMENSION
with Frank Jordan

We are living in the most turbulent times in the recorded history of mankind on Earth. The End of Times predicted in the Bible, the end of the Mayan calendar, the Galactic Alignment shift, the passage of Nibiru, and electromagnetic pole shifts are all indicators of possible calamities in the near future.

I see these events not as threats to the survival of mankind, but as an opportunity for us evolve into a higher state of consciousness. We are maturing into becoming co-creators with the beings that seeded their genes into the naturally evolving primates to create humans thousands of years ago on this planet. It's time for us to grow up. No one can do it for us; evolution of consciousness involves a personal struggle with the energetic programming that holds us in the third dimension of primitive survival dominated by our low-self animal natures. We survive, gain knowledge, have kids, gain possessions, then what? We die, only to do it over again and again until we discover there is more.

The more-ness comes in discovering our spiritual natures, and that we have psychic gifts and abilities that can better our lives and give us clearer understanding of who we are. We become seekers in the fourth dimension, always wanting more, but clinging to past knowledge for answers rather than trusting our intuition to guide us into the future.

Entering the fifth dimension requires that we release the security of the past, and the forms of reality that have meant survival by domination. Domination is dependent on masculine thinking that is justified in controlling, manipulating, stealing, hording, invading, even killing to survive. We have to let go of that world, and that can be scary. Is it worth the risk? Will you lose everything you cling to for survival if you follow your intuition and go for it? Probably, but if it can be lost, it was never really yours anyway. And it was holding your frequency level down.

Human consciousness has an opportunity now to move into the 5th dimension, and it is happening around us at warp speed. Dominion is understanding that there is enough for everyone if it is shared according to our needs. Dominion is the female principle that loves shares, nurtures, and empowers life. In the 5th dimension there will be no armies, lawyers, borders, politicians, or bankers or religions. They simply won't be needed.

With each dimension comes a new level of power, and the ability to use energy in manifestation. I use modern communication tools, such as Skype, to unify large numbers of people in meditation groups to alter negative Earth Changes before they happen, influence weather, and to free humans around the world from domination patterns so they can use free choice to make changes in their situations. This is not done in Domination; we simply allow them to think in Dominion.

Another skill that has evolved is the ability to send frequencies of healing energy through the meditations grid to listeners that sometimes results in dramatic physical and emotional healings. The degree of success is dependent on the persons desire to be healed, and to their willingness to have a spiritual experience, and there is always a growth of consciousness as a result. Stephan tells me that as we move into the fifth dimension such manifestations will be commonplace, and will extend to anything we direct our will toward.

One important factor is emerging. As I learn to recognize and apply the frequencies from the Galactic Center people experience them and learn to pass the energies to others. This is resulting in a wave of resonance that is raising the frequency of people around the world. Everyone can experience it and learn to draw energy from the limitless pool around us to do beneficial work. The end result is growth of consciousness, and when enough get it, a spontaneous shift in everyone will occur. Our goal is to have the shift occur before Dec. 21st, and that no one will be left behind.

In the workshops we learn the basic tools for clearing blocks and utilizing energy for beneficial purposes. Experiencing the energy flows and repetition of the skills opens our intuitive channels and stimulates our DNA to reorganize into skill sets that have been lost for generations. We can regain our birthright as our Galactic Brothers inspire us to remember who we really are. I look forward to working with you in workshop, or private sessions, to help you make the shift.
