

This Fun and Educational Workshop is suited for both Novice & Experienced Dowzers.

Dowsing is a way of connecting or tuning into information that would otherwise not be accessible to you. With a little patience and practice anyone can do it. And have effective results. This workshop will cover the basics of dowsing as well as expand into powerful techniques you can use in your everyday life. Techniques which work, yet so simple anyone can do them.

We are like a television that is working but not receiving anything because we have not plugged it in to the electrical outlet.

Some people are gifted with clairvoyance and other 'sixth-sense' abilities - but most of us do not think we have these skills. Dowsing is a way of opening up our abilities by allowing us access to information via the energy fields around us.

Expand Your Dowsing Abilities

Bobbers, there will be some that you can use for the day or you can purchase same at the workshop

Anyone can Dows. This workshop is perfect for both Beginner and Experienced Dowzers. You may want to learn to dows or hone your current skills. At the end of the day you will have all you need to begin dowsing for yourself.

In the afternoon with an understanding of the fundamental techniques of dowsing, we will expand the application of this age-old techniques to move and shift energy, solve problems, find out things and create beneficial situations. These techniques will allow you to move into the universal energy field to hone your own intuition.

The day is designed to provide you with a firm foundation in the art of dowsing. In the morning we will cover the basic techniques used by dowzers to ask questions. That is to dows, with the aid of simple hand-held tools or instruments (pendulums, bobbers & L-rods) for that which is otherwise hidden from view or knowledge.
